2023 Annual Production Sale Welcome

BY SARAH MYER

**Dear Valued Bull Buyers,
Welcome to Yulgilbar Station's Annual Production Sale.**

As we embark on this year's sale, we are filled with gratitude for your continued support and enthusiasm for our cattle. The past 12 months have been a journey of both challenges and triumphs, and we are thrilled to share our progress with you. Notwithstanding the fact that the memories of floods, Covid, fires and drought are still fresh in our minds, over the last 18 months, we have seen a significant decline in cattle prices, presenting us with new challenges and opportunities!

In the midst of these challenges, Brett and Lucy Ellem, the General Managers of Yulgilbar Station, have shown exceptional leadership and dedication and have played a pivotal role in navigating these turbulent times. With their guidance we have achieved great success as we continue to strive to improve our genetics.

To this end, we are humbled by the recent accolades our cattle have received at various prestigious events over the last 12 months, which you will see listed on various pages in this catalogue. These achievements serve as a testament to the quality of our livestock and the unwavering commitment of our team here in Yulgilbar.

The Myer Family extends a warm welcome to all of you. Your presence (either physical or on-line) at our Annual Production Sale is an acknowledgment of the shared passion we have for this industry. We look forward to fostering existing relationships and building new ones, knowing that together, we will continue to strengthen the future of the cattle industry.

Yours sincerely,
Sarah Myer, Sid Myer, Rupert Myer and Samantha Baillieu

Sale information

GUARANTEE

All stud stock are guaranteed breeders. Any claim against the breeding ability of any animal should be made in writing and accompanied by a veterinary certificate within 6 months of sale. In the event of an animal failing to breed, it may be either replaced with an animal of comparable value or credit to the purchase price will be given at the following sale or on a private sale animal.

All lots sell as EU Accredited

Vendor rebate – The vendors agree to pay:

STUD CATTLE

- 4% rebate to outside agents who
 - Introduce buyers in writing at least 24 hours prior to the sale.
 - Accompany client to the sale.
 - Settle all accounts in full no later than Friday 10th September 2023.
- 2% rebate to outside agents who introduce buyers at least 24 hours prior to sale and settle all accounts in full no later than Friday 10th September 2023.
- **No rebate will be paid outside these conditions (strictly enforced).**

Delivery of sale cattle will be given from Saturday 4th September 2023. No verbal instructions will be accepted and no cattle are to be loaded without approval of Brett Ellem or the delivery agent (George and Fuhrmann). Please fill out the delivery form at the back of the catalogue.

HEALTH

- Yulgilbar Station is an accredited TB and Brucellosis free herd.
- Stock from Yulgilbar Station (Broadwater Sales Complex) will be free to move.
- Yulgilbar Station is currently rated Johnnes JBAS 7 in NSW and has completed Bio security plans which can be viewed on request on sale day.

VACCINATION PROGRAM

All stud cattle will have been vaccinated for:

- Botulism
- 3 day sickness
- 7-1
- Bulls for vibrio
- All cattle have been treated with Dectomax pour-on and Flukecare C.
- Pestivirus and tested negative for Persistently Infected (P.I.) animals

To maintain ongoing immunity, it is recommended that you vaccinate your purchases with an annual booster shot in June each year.

TELEPHONE LINK UP

In the event of you being unable to be at the sale and would like to bid, we will arrange for a phone link up should you wish to participate. Please contact the vendor or your preferred agent prior to the sale. Live online bidding available.

Disclaimer

Whilst all due care and attention has been paid to the accuracy in the compilation of this catalogue, either the vendors (or their employees) nor the selling agents assume any responsibility what so ever for the correctness, use or interpretation of the information included this sale catalogue.

All persons attend Yulgilbar Station and the sale at their own risk.

GETTING HERE

Sale at Broadwater Sales Complex, Yulgilbar Station, Baryulgil NSW

Please note poor mobile service

Google directions to Yulgilbar sale:

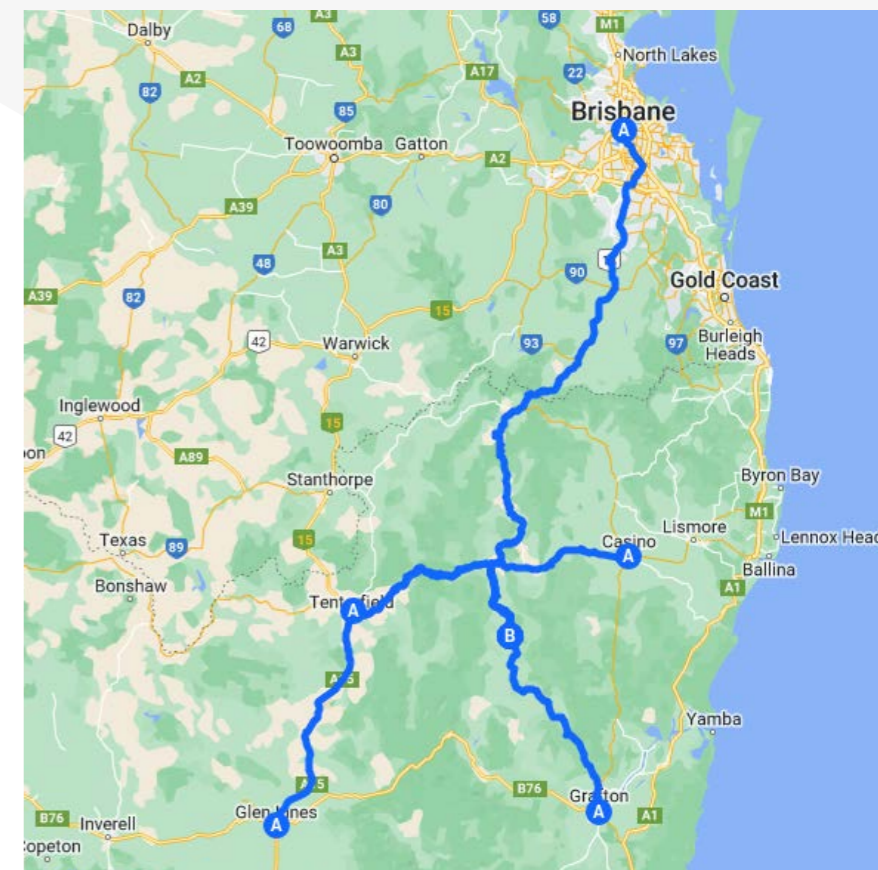

<https://maps.google.com.au/maps/ms?msid=205627425238397212181.00048d734cb180c56b0c8&msa=0&ll=-28.671311,150.413818&spn=4.46239,9.876709>

Yulgilbar Airport

Baryulgil airfield is a private non licensed airfield located on Yulgilbar Station at Baryulgil NSW. The Airfield is fenced; located in a Cattle Paddock, the surface is sealed, the direction is approximately 150/330 degrees, and there is an uphill rise to the South East of approximately 20 meters over the 1600 metre length of the Airfield.

Elevation is approximately 450 AMSL.
Position: S29.13.3 E152.37.5.

- Please contact the station prior to landing (24 hours notice) so arrangements can be made to meet planes on arrival and transport passengers to the sale.
- There are daily commercial flights to Grafton and Lismore airports by Rex Airlines.
- A number of motels are located in Tenterfield, Casino, Lismore and Grafton (prior booking recommended)
- Travel time by car to Yulgilbar Station (Broadwater Sales Complex)
 - Casino – 1 hour
 - Tenterfield – 1hour 30 minutes
 - Grafton –1 hour 15 minutes

How to Register and Bid on AuctionsPlus

- 1 Go to www.auctionsplus.com.au to register at least 48 hours before the sale.
- 2 Select “Sign Up” in the top right hand corner.
- 3 Fill out your name, mobile number, email address and create a password.
- 4 Go to your emails and confirm the account.
- 5 Return to AuctionsPlus and log in.
- 6 Select “Dashboard” and then select “Request Approval to Buy”.
- 7 Fill in buyer details and once completed go back to Dashboard.
- 8 Complete buyer induction module (approx. 30 minutes).
- 9 AuctionsPlus will email you to let you know that your account has been approved.
- 10 Log in on sale day and connect to auction.
- 11 Bid using the two-step process – unlock the bid button and bid at that price.
- 12 If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Kris Elliott, Yulgilbar Pastoral Company and Brett Ellem, General Manager, Yulgilbar Pastoral Company.

Yulgilbar Station (since 1840)

Celebrating 183 years Pastoral Settlement

Yulgilbar Station was founded in 1840 by Edward Ogilvie as a 200 000 acre sheep station. The run selected comprised the most fertile region of the Clarence River valley; in North Eastern New South Wales encompassing over 80 kilometers of the river. The property was owned by the Ogilvie family until being sold in 1926 to a syndicate of the Morrissey brothers and silent partner Tom Baillieu.

Sam Hordern was subsequently invited to join the syndicate, ultimately purchasing Yulgilbar in its entirety in 1949. Sam was a foundation director of King Ranch Australia and the first President of the Santa Gertrudis Australia Association.

Sam Hordern's daughter, Sarah and husband, Baillieu Myer, inherited Yulgilbar upon Sam's untimely death in 1960. Today the property still remains under ownership of Sarah and Baillieu Myer.

What's in a name:

Yulgilbar means 'Place of many (or little) fishes.'

Yulgilbar is a heritage listed property of natural beauty and of environmental significance.

Yulgilbar contains much historical infrastructure, dating back to 1840. The station is also characterized by its impressive permanent water systems. Yulgilbar was proclaimed a Flora and Fauna reserve in 1971.

Farming: 4500 acres is currently farmed, growing summer and winter cash and fodder crops, supplying the feed requirements of the Station as well as running a significant Hay and Fodder sales business thru "Tooloonki Division".

A herd of 5000 Santa Gertrudis cattle are now run on Yulgilbar. Yulgilbar weaner's have long been renowned for their constitution and doing ability and, in particular, their ability to gain weight under favorable conditions. These steers have sold previously from Victoria to central Queensland with excellent results.

The first Santa Gertrudis bulls were introduced to Yulgilbar Station in 1953 over Durham Shorthorn type cattle with a Devon influence. 16 King Ranch bulls dominated the early history of Yulgilbar.

Other notable sires in the early history of Yulgilbar included bulls from Bolinda vale, sister stud - Elgee Park, Robenlea, Murrumbo, Yarrowonga, Winderadeen, Rosevale, and The Lakes. These bulls all contributed to the development of the stud, along with numerous Station bred sires. Recognized cow lines in the Yulgilbar herd included the "Gold" family going back to a "Glen Prairie" cow (Kirkby family).

A major expansion of the stud has evolved over the last 10 years. 500 Stud females are currently single sire mated to elite Poll Santa Gertrudis sires.

Since 2002, 80 outside bred additional stud sires have been introduced to the Yulgilbar gene pool. A significant addition to Yulgilbar genetics eventuated in 2008 with the landmark purchase of "The Lakes" Santa Gertrudis stud (owned by the Bolster family). The female portion of this widely recognized and established stud were purchased; marking the merger of these 2 major stud operations. Yulgilbar now stands as the largest Santa Gertrudis stud cattle operation in NSW.

Significant AI programs are also conducted utilizing the best available genetics. An Australian record at auction (\$80 000) was paid in 2007 for Warena Sahara (poll). This record stood until 2015.

Waco Queenslander (P) was purchased for the then record price in 2021 \$110,000 while the Australian semen rights were purchased in the \$197,000 (AUD) record breaking American Santa Gertrudis bull - Red Doc Never Better (P).

Murgona Nightcap N43 (P) was recently purchased for \$105k from the Murgona stud at the Heart land sale in Roma 2021.

Yulgilbar Santa Gertrudis Stud History

The Station and Stud were managed for many years by the Rogan family. Allan Rogan was manager of Yulgilbar from 1964 - 1987. He was largely responsible for the early success of the stud. The first annual production sale at Yulgilbar was conducted in September 1966.

These annual production sales continued until the beef crash in 1974. These sales comprised the sale of bulls, females, steers and significant numbers of Quarter Horse. Post 1974 Yulgilbar sold on a regular basis at the Summer-land Santa Gertrudis sale in Casino.

Sam Hordern, King Ranch, and others were also responsible for introducing Quarter Horses to Australia. Today Yulgilbar Quarter Horse stud is run from Elgee Park on the Mornington Peninsula in Victoria.

Peter Rogan managed Yulgilbar from 1988-1996. Gail and Blythe Richie managed Yulgilbar from 1996-2001. Rob and Lorraine Sinnamon 2002 to 2021. And currently under the new management of Brett and Lucy Ellem.

Yulgilbar believe many breeds of cattle can benefit from the introduction of hybrid vigor through the use of Santa Gertrudis sires. To this end Yulgilbar also breed a number of Santa cows to Angus, Hereford and Charolais to demonstrate the benefit of crossbreeding with Santa Gertrudis. In recent times Yulgilbar has moved to the vertical integration of a significant portion of its product.

YULGILBAR STAFF

Yulgilbar Station is fortunate to have an excellent team responsible for the management of the operation. Thank you for the contribution made by all these people.

Yulgilbar has paddock sale bulls available year round.

SHOWS

We are proud of our record in recent years exhibiting many stud cattle show champions up and down the East Coast of Australia. We have now consolidated our showing to focus on the commercial reality of our business. We are particularly proud of winning the Santa Gertrudis Australia Association National Steer trophy for 9 of the past 11 years.

We believe comparison of the end result is important and gives us an indication of how industry relevant our cattle are in the market place.

We have made a "commercial practice" of showing and then selling "different" steers at each competition. Yulgilbar has been also involved with the NSW D.P.I.; MLA and CRC in recent research and validation work including validation of the "Feedlot Calculator, CRC "Age to Puberty" scanning; and polled verification testing.

Brett, Lucy, Hunter, Jewel and Dusty Ellem.

- Winner Class 38A Pen of 6 ADG 3.186kg
- Class 38 overall winners of the Ken Crotty OAM Perpetual Trophy

Cattle Selection and Santa Gertrudis Breedplan

CATTLE SELECTION

Yulgilbar advocates balanced assessment criteria for cattle selection. This combines visual appraisal for structural soundness, temperament and overall conformation; prudent use of raw measurement data - e.g. frame score, weight, daily weight gain, actual scrotal measurements, eye muscle area and fat scans. Selection of extremes should always be treated with caution. Yulgilbar supports the Santa Gertrudis classification system. Santa Gertrudis group breed plan provides estimates of breeding values that are also of assistance in making choices. Single trait selection for any characteristic is believed to be dangerous and lacks balance in any breeding program.

Use of a combination of the many available "tools" for selection in the industry today is valuable and allows the discerning cattle person to be far more informed about their livestock selections than previously before.

Please note bulls marked as Herd Bulls in the catalogue were not registered or eligible for classification. Many of these bulls would classify under breed standards, but due to not being registered are not presented for classification.

Yulgilbar now for a number of years has been utilising Parent Verification through DNA to ensure integrity in the data we provide. We are also excited that now with genomic enhanced EBV data being incorporated in Santa Gertrudis breedplan, more information will be available to the industry in assisting to make informed breeding decisions. We look forward to further utilising this data as its accuracies grow.

- This Year's Sale Bulls have been tested for the Horn Poll Test (developed by Beef CRC and commercialised by Phizer). Results will be available on sale day and on our web site once available.
- Santa Gertrudis Group Breedplan figures supplied are July 2022 group run.

FERTILITY

- All females, stud and commercial are pregnancy tested annually and all empty females are fattened and sold for slaughter
- Sale bulls are semen tested and soundness evaluated
- Sale bulls have been morphology tested
- Sale bulls are tested negative for Persistently Infected carriers of Pesti-Virus
- Herd sires are semen tested annually.

HornPoll

Understanding the EBVs, Selection Indexes and Accuracy.

EBVS

An animal's breeding value is its genetic merit, half of which will be passed on to its progeny. While we will never know the exact breeding value, for performance traits it is possible to make good estimates. These estimates are called Estimated Breeding Values (EBVs).

In the calculation of EBVs, the performance of individual animals within a contemporary group is directly compared to the average of other animals in that group. A contemporary group consists of animals of the same sex and age class within a herd, run under the same management conditions and treated equally. Indirect comparisons are made between animals reared in different contemporary groups, through the use of pedigree links between the groups.

EBVs are expressed in the units of measurement for each particular trait. They are shown as +ive or -ive differences between an individual animal's genetics difference and the genetic base to which the animal is compared. For example, a bull with an EBV of +50 kg for 600-Day Weight is estimated to have genetic merit 50 kg above the breed base of 0 kg. Since the breed base is set to an historical benchmark, the average EBVs of animals in each year drop has changed over time as a result of genetic progress within the breed.

The absolute value of any EBV is not critical, but rather the differences in EBVs between animals. Particular animals should be viewed as being "above or below breed average" for a particular trait.

Whilst EBVs provide the best basis for the comparison of the genetic merit of animals reared in different environments and management conditions, they can only be used to compare animals analysed within the same analysis. Consequently, Santa Gertrudis BREEDPLAN EBVs cannot be validly compared with EBVs for any other breed.

EBVs are published for a range of traits covering fertility, calving ease, milking ability, growth, and carcass merit. When using EBVs to assist in selection decisions it is important to achieve a balance between the different groups of traits and to place emphasis on those traits that are important to the particular herd, markets and environment.

One of the advantages of having a comprehensive range of EBVs is that it is possible to avoid extremes in particular traits and select for animals with balanced overall performance.

BIRTH WEIGHT EBV (KG)

is based on the measured birth weight of progeny, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth. This is particularly important when selecting sires for use over heifers.

200-DAY GROWTH EBV (KG)

is calculated from the weight of progeny taken between 80 and 300 days of age. Values are adjusted to 200 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-DAY WEIGHT EBV (KG)

is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-DAY WEIGHT EBV (KG)

is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for age of dam. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

MATURE COW WEIGHT EBV (KG)

is based on the cow weight when the calf is weighed for weaning, adjusted to 5 years of age. This EBV is an estimate of the genetic difference in cow weight at 5 years of age and is an indicator of growth at later ages and potential feed maintenance requirements of the females in the breeding herd. Steer breeders wishing to grow animals out to a larger weight may also use the Mature Cow Weight EBV.

MILK EBV

(kg) is an estimate of an animal's milking ability. For sires, this EBV indicates the effect of the daughter's milking ability, inherited from the sire, on the 200-day weights of her calves. For dams, it indicates her milking ability.

SCROTAL SIZE EBV (CM)

is calculated from the circumference of the scrotum taken between 300 and 700 days of age and adjusted to 400 days of age. This EBV is an estimate of an animal's genetic merit for scrotal size. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

CARCASS WEIGHT EBV (KG)

is based on abattoir carcass records and is an indicator of the genetic differences in carcass weight at the standard age of 650 days.

EYE MUSCLE AREA EBV (SQ CM)

is calculated from measurements from live animal ultrasound scans and from abattoir carcass data, adjusted to a standard 300 kg carcass. This EBV estimates genetic differences in eye muscle area at the 12/13th rib site of a 300 kg dressed carcass.

More positive EBVs indicate better muscling on animals. Sires with relatively higher Eye Muscle Area EBVs are expected to produce better muscled and higher percentage yielding progeny at the same carcass weight than will sires with lower Eye Muscle Area EBVs.

RIB FAT AND RUMP FAT EBVS (MM)

are calculated from measurements of subcutaneous fat depth at the 12/13 rib site and the P8 rump site (from live animal ultrasound scans and from abattoir carcasses) and are adjusted to a standard 300 kg carcass. These EBVs are indicators of the genetic differences in fat distribution on a standard 300 kg carcass.

Sires with low, or negative, fat EBVs are expected to produce leaner progeny at any particular carcass weight than will sires with higher EBVs.

RETAIL BEEF YIELD EBV (%)

indicates genetic differences between animals for retail yield percentage in a standard 300 kg carcass. Sires with larger EBVs are expected to produce progeny with higher yielding carcasses.

INTRAMUSCULAR FAT EBV (%)

is an estimate of the genetic difference in the percentage of intramuscular fat (marbling) at the 12/13th rib site in a 300 kg carcass. Depending on market targets, larger more positive values are generally more favourable.

SELECTION INDEXES

Santa Gertrudis selection indexes are calculated for two market specifications, namely, Domestic and Export. These Indexes relate to typical commercial herds targeting these specifications.

Indexes are reported as an EBV, in units of relative earning capacity (\$'s) for a given market. They reflect both the short-term profit generated by a sire through the sale of his progeny, and the long-term profit generated by his daughters in a sustainable cow herd, if a proportion of heifers are retained for breeding.

The Indexes are derived using Breed Object technology. More information on this technology is available from the Breed Object web site.

DOMESTIC PRODUCTION INDEX (\$)

Estimates the genetic differences between animals in net profitability per cow joined for an example self-replacing commercial herd (run in a temperate environment) producing steers for the Domestic trade. This Index assumes that the steer progeny are pasture grown and finished and marketed at 500 kg live weight (280 kg HSCW and 12 mm P8 fat depth) at 16 months of age. Daughters are retained for breeding. More information is available on the EBV weightings for the Domestic Production Index.

EXPORT PRODUCTION INDEX (\$)

Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd (run in a sub-tropical environment) producing steers for the Export trade. This Index assumes that the steer progeny are pasture grown and finished and are marketed at 620 kg live weight (340 kg HSCW and 15 mm P8 fat depth) at 28 months of age. Daughters are retained for breeding. More information is available on the EBV weightings for the Export Production Index.

Note that \$Index Values for individual animals are sensitive to the assumptions used in the BreedObject analysis to calculate the relevant selection index.

Santa Gertrudis Breedplan

ACCURACY

Accuracy (%) is based on the amount of performance information available on the animal and its close relatives - particularly the number of progeny analysed. Accuracy is also based on the heritability of the trait and the genetic correlations with other recorded traits. Hence accuracy indicates the "confidence level" of the EBV. The higher the accuracy value the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives. Even though an EBV with a low accuracy may change in the future, it is still the best estimate of an animal's genetic merit for that trait. As more information becomes available, an EBV is just as likely to increase in value, as it is to decrease.

Accuracy values range from 0-99%. The following guide is given for interpreting accuracy:

ACCURACY RANGE	INTERPRETATION
LESS THAN 50%	Low accuracy. EBVs are preliminary and could change substantially as more performance information becomes available.
50 - 74%	Medium accuracy, usually based on the animal's own records and pedigree.
75 - 90%	Medium-high accuracy. Some progeny information included. EBVs may change with addition of more progeny data.
MORE THAN 90%	High accuracy estimate of the animal's true breeding value.

As a rule, animals should be compared on EBVs regardless of accuracy. However, where two animals have similar EBVs the one with higher accuracy could be the safer choice, assuming other factors are equal.

For further information please contact Tropical Beef Technology Services or Santa Gertrudis BREEDPLAN

PRESCRIBED CONDITIONS OF SALE BY AUCTION

Property, Stock & Business Agents Act (NSW) 2002,
Part 6, s.77 and Regulations 2003.

Clause 18 (1) – The following conditions are applicable to and in respect of the sale by auction of land or livestock:

- (a) The principal's reserve price must be given in writing to the auctioneer before the auction commences.
- (b) A bid for the seller cannot be made unless the auctioneer has, before the commencement of the auction, announced clearly and precisely the number of bids that may be made by us on behalf of the seller.
- (c) The highest bidder is the purchaser, subject to any reserve price.
- (d) In the event of a disputed bid, the auctioneer is the sole arbitrator and the auctioneer's decision is final.
- (e) The auctioneer may refuse to accept any bid that, in the auctioneer's opinion, is not in the best interests of the seller.
- (f) A bidder is taken to be a principal unless, before bidding, the bidder has given to the auctioneer a copy of a written authority to bid for on behalf of another person.
- (g) A bid cannot be made or accepted after the fall of the hammer.
- (h) As soon as practicable after the fall of the hammer the purchaser is to sign the agreement (if any) for sale.

Clause 18 (2) – The following conditions, in addition to the above, are applicable to and in respect of the sale by auction of residential property or rural land:

- (a) All bidders must be registered in the Bidders' Record and display an identifying number when making a bid.
- (b) Subject to subclause (2A), the auctioneer may make only one vendor bid at an auction for the sale of residential property or rural land and no other vendor bid may be made by the auctioneer or any other person.
- (c) Immediately before making a vendor bid the auctioneer must announce that the bid is made on behalf of the seller or announced "vendor bid".

Clause 18 (2A) – the following conditions, in addition to the above, are applicable to and in respect of the sale by auction of co-owned residential property or rural land or the sale of such land by a seller as executor or administrator:

- (a) More than one vendor bid may be made to purchase the interest of a co-owner
- (b) A bid by or on behalf of an executor or administrator may be made to purchaser in that capacity.
- (c) Before the commencement of the auction, the auctioneer must announce that bids to purchase the interest of another co-owner or to purchase as executor or administrator may be made by or on behalf of the seller.
- (d) Before the commencement of the auction, the auctioneer must announce the bidder registration number of any co-owner, executor or administrator or any person registered to bid on behalf of any co-owner, executor or administrator.

Clause 18 (3) – The following condition, in addition to subclause (1), is applicable to and in respect of the sale by auction of livestock:

The purchaser of livestock must pay the stock and station agent who conducted the auction (or under whom immediate and direct supervision this auction was conducted) or the vendor the full amount of the purchase price:

- (a) if that amount can reasonably be determined immediately after the fall of the hammer – before the close of the next business day following the auction, or
- (b) if that amount cannot reasonably be determined immediately after the fall of the hammer – before the close of the next business day following determination of that amount, unless some other time for payment is specified in a written agreement between the purchaser and the agent or the purchaser and the vendor made before the fall of the hammer.

Property, Stock and Business Agents Act (NSW) 2002,
section 78 (3) and Regulations 2003, clause 20 (1)

WARNINGS PENALTY FOR COLLUSIVE PRACTICES

It is an offence against the Property, Stock & Business Agents Act 2002 for a person to do any of the following as a result of a collusive practice, or to induce or attempt to induce another person by a collusive practice to do any of the following:

- (a) to abstain from bidding, or
- (b) to bid to a limited extent only, or
- (c) to do any other act or thing that might prevent free and open competition.

Severe penalties may be imposed on persons convicted of collusive practices.

Property, Stock & Business Agents Act (NSW) 2002,
section 83 (2) and Regulations 2003, clause 20 (2):

SUCCESSFUL BIDDERS

The actual successful bidder at an auction sale must give to the auctioneer or an employee of the auctioneer:

- (a) the bidder's name, or
- (b) the name of the person on whose behalf the successful bid was made.

PENALTY FOR DUMMY BIDDING

It is an offence against the Property, Stock & Business Agents Act 2002 for a person to do any of the following:

- (a) make a bid as the seller,
- (b) make a bid of behalf of the seller (unless the person is the auctioneer),
- (c) procure another person to make a bid on behalf of the seller.

Any bid made with the dominant purpose of benefitting the seller constitutes a bid made of behalf of the seller.

A bid may be found to be a bid made on behalf of the seller even though the seller did not:

- (a) request the bid, or
- (b) have any knowledge of the bid.

Severe penalties may be imposed on persons convicted of dummy bidding.

OCCUPATIONAL HEALTH AND SAFETY

All persons attending the sale are advised by the seller that the sale may involve a risk of physical harm and/or loss. Livestock, machinery, plant and equipment may be offered for sale and each such item has its own inherent risks that persons attending the sale need to appraise themselves of. All persons attending the sale do so at their own risk. All purchasers of items sold are advised that they must ensure, before each such item is removed from the sale, that it is safe and without risks to health when properly used. The seller does not accept any responsibility for any harm, loss or damage whatsoever and that you enter or attend the sale at your own risk. The seller's agent is instructed by the seller to conduct the sale in the manner directed by the seller with items placed out and submitted for sale as directed by the seller. The seller's agent has no control over any items offered for sale and accepts no responsibility for any harm, loss or damage whatsoever and that you enter or attend the sale at our own risk.
