# HELMSMAN SYSTEM

## WHY AND HOW IT WORKS

### THE BENEFITS

- More time to consider lodging a bid.
- You can place genuine bids on any bull of your choice at any time during the sale period.
- Opportunity to re-assess each lot during the same period without any pressure to make an instant decision.
- Take the bull of your choice, not in order of sale lots
- Can choose multiple bulls from same contemporary groups to give you choice and flexibility and time to average your purchase costs.

### HOW IT WORKS

- Purchasers must register for a buyer's number on arrival at the agent's office and receive a bid card, just like a normal auction or register online with Stocklive Elite.
- All bulls will be displayed prior to and during the sale for inspection.
- Catalogue and supplementary sheet available at the sale.
- All lots will be displayed on a board or screen and as bids are taken, the price will be updated.
- The sale will open at 11am when the timer starts. After the sale starts all animals are on the market simultaneously. All lots are on the market for the duration of the sale and finish at the same time. Timer will continue until 3pm or until there is 1 hr from last bid and the timer countdown starts with Stocklive from the last active bid.
- Buyers may bid on any animal regardless of lot number.
- Bidding will start with the reserve price and all bids are in \$500 increments.
- Once a bid is submitted to the office and recorded it cannot be retracted and is responsible for that bid until it is outbid.
- Following the sale the agent will close to finalize data and generate documents for purchasers.

# BREEDER HISTORY

**Weetalabah** started in 1988 and is run by Aderian, Julie Nixon and family at Dulacca QLD. Bulls are rotated between being hand fed and fed in self-feeders when the grass dries off over winter. They are fed a ration to guarantee the bulls will last a lifetime for their new owners. All the show cattle come out of the paddock and must perform in the paddock first, before going into the show strings. Calves are not fed any creep, with the cattle running on native and improved grasses with lick and lick blocks used as the only supplement.

**Mickey Mouse** was started in 2015 by Aleacea Nixon, after being given a few females from her parents. They go back to the great Willy, Sarsha and Princess females from Weetalabah. The highlight for Aleacea has been having the Junior Champion and Grand Champion Bull, reserve senior bull and reserve junior bull at Ekka in 2018. Aleacea is still building up her herd and will have 1 young bull in this sale. The Mickey Mouse herd is run completely with the Weetalabah herd and are treated exactly the same.

**Kevlor** Gelbvieh was started after Annie Minehan fell in love with Gelbvieh cattle, when working for Aderian and Julie during work experience. They gave her a female to start her own stud in 2014 and after a few years and hard work, she was able to purchase a few females from some of the top studs in Australia to create her baseline of cows. Along with Aderian and Julie, semen from the outstanding Canadian Bull,

RWG Right Combination was purchased and has been a game changer in the Kevlor breeding program. Consisting of approx 20 head the cattle. Kevlor is pleased to have 1 bull available in this sale.

**Calveston** owned by Tracie and Michael Borg, where they run a large grazing and cropping property at 'Calveston', North of Clermont, QLD. They were introduced to the breed 22 years ago, when they purchased their first bull, and they joined him to their cows with other Brahman bulls. They were then so surprised to have lots of offspring and were very happy with the temperament and the quality and growth in the calves that they have had Gelbvieh ever since!!! The Borg's find the Gelbvieh cross calves have very quick growth rates, and easily make bullocks with milk teeth dressing at 300-350kg. The Borg's have also observed that the Gelbvieh Bulls they have used have a very strong Poll Gene. Most of their Brahman herd is horned, however they are finding they are still getting 80% poll calves. They keep a very select lot of heifers and they make lovely breeders, maturing very quickly, are very fertile and produce lots of milk. They prefer to have any amount of Gelbvieh in their females, their philosophy "is that it is better to have a little Gelbvieh than no Gelbvieh!" The Borg's also have a small purebred self-replacing herd that they run at their other property at Maclagan, near Dalby, where they are run on Buffel grass hills and then the bulls are transported to Calveston as weaners to grow out.

AWB BIRCH'S THE BOXER 21D

**SIRE:** WEETALABAH Q BALL Q247

WEETALABAH ULTRA VIOLET K013

RWG RIGHT COMBINATION 5506

**DAM:** WEETALABAH ATLANTIS Q219

WEETALABAH DINA G004

**NOTES** This is an exceptional bull with loads of spunk and softness. He was the calf on the Grand Champion Cow at Ekka 2022 and the 2023 Junior Champion Bull. He is by the new home bred sire Q Ball who is breeding well over the Right Combination daughters. Dam is a first calf heifer. Standing on tremendous bone, with huge sire appeal, he is a larger framed bull with exceptional SC size, 45cm at only 13months old!!!! Quiet is an understatement, he is a real softy. A bit larger birthweight at 52kg Birthweight but out of a heifer, however we would recommend using him over cows to be safe.

**BUYER****\$****Paddock Bulls**

# GOLDEN ADVANTAGE SALE

“Golden” means Gold in Germany, Clermont is known as the city of Gold.

“Advantage” means with adding Gelbvieh to your herd you will be gaining an advantage.

*Cows that milk = calves that thrive = Gelbvieh Advantage.*

Gelbvieh mothers are renowned around the world as the best mothers in the Beef Industry, and the quiet European alternative.

From all the vendors, a huge

# THANK YOU

to all that have purchased today.

## A FEW TIPS FOR TAKING YOUR NEW BULL HOME

- We recommend using bulls in single sire groups or with bulls from their same contemporary groups. Young bulls can be bullied if added to a group of older bulls, especially when females are close by.
- All the Calveston Bulls have been run together and can comfortably go back to your place together.
- All the paddock bulls from Weetalabah have been run together and can comfortably go back to your place together.
- All the show bulls have been fed and run separately and we recommend not be joined with bulls from the above 2 groups.
- As with any animal, it is important to plan ahead to ensure your investment settles in well and to allow him time to adapt to his new environment before commencing work.
- Check bulls regularly for the first few months.
- Gelbvieh bulls are very fertile and generally will get the job done and walk away.
- All bulls in the sale have been semen tested prior to the sale but we would also recommend semen testing your bulls before each breeding season.

"I've had the pleasure of working with the Nixon's Gelbvieh cattle over the past 6 years on a veterinary capacity. I'm continually impressed by their exceptionally docile temperament, ease of calving and great mothering abilities. The bulls have proved to be high performers with superb results demonstrated during crush side semen evaluations, morphology analysis and quantity of samples making them very easy to collect for freezing. These Gelbvieh's have proved to be early maturing cattle demonstrating excellent weight gains, feed efficiency and impeccable fertility. These animals are outstanding performers in all aspects making them an exceptional line of cattle in my opinion."
