Valena Vale

DROUGHTMASTERS

About *Valera Vale*

We are breeders of commercial Droughtmaster cattle underpinned by the genetics of our bull breeding operation. As such we are well aware of the profit drivers in the beef industry and realize that a functional breeder herd achieving high survival and calving rates is the main determinant of profitability in breeder and breeder/fattener enterprises. We don't waste selection pressure on anything that isn't related to dollars for a commercial operation.

High levels of breeder performance and environmental adaptation are intrinsically linked because only functional cows are able to maintain body condition to survive, lactate, cycle and fall pregnant in our too often challenging environment. Our cows are run under strictly commercial management conditions so that we can select the genetics that will be profitable for our commercial clients, and are expected to present a healthy calf for branding each year after a fourteen week joining period during which it may or may not rain.

The Bulls we offer you are the product of these efficient females. They are run on Buffel grass pastures under the same conditions as our steers, before silage preparation at Avilion, Greymare. Our aim is to safely prepare the bulls to an impressive but highly functional sale condition without compromising their current and future health. Valera Vale bulls are ready to work as soon as they're off the truck.

We do not believe in over-preparing our bulls and often face discrimination in the marketplace because of it. However, we continue to under prepare our bulls so they can over perform for our clients. As a result, Valera Vale bulls have a reputation for being able to adapt to any of the conditions experienced throughout Northern Australia. We do hear from clients that bulls grow too big but have never had them criticize them for being small.

We do not trim feet. Ever.

We guarantee our bulls in both the short and long term as will be attested by our long term clients. If one of our bulls does not perform to your standards, we need to know so that we can fix the problem.

We were late converts to the breeding of polled cattle, and did not see any problem with dehorning. Our clients began demanding polled bulls and we struggled to accommodate the demand using phenotypically polled and even DNA tested “homozygous poll” sires. We found the existing DNA tests to be very unreliable and they have only ever been presented as having a less than 100% probability of having the right result. With the development of more accurate SNP DNA test by Neogen we have been able to select for poll cattle more effectively and have had no further instances of horn calves from inaccurately identified “Polled” bulls. This has allowed us to produce large numbers of polled cattle without having to sacrifice selection for other traits. We are now convinced of the value of breeding polled cattle especially in light of the 2% extra mortality associated with dehorning recorded in the broadly based Cash Cow project.

We confidently predict that none of our PcPc bulls will produce a horned calf regardless of the horn status of the females. These PcPc bulls can dehorn a herd in one generation.

The Bulls will be Sperm Morphology tested, DNA 50K SNP recorded, Sire, Poll gene, Brahman and Pompes disease tested, have growth rate data on Silage (to ensure an even playing field) and Dam history presented.

Our Philosophy

These heifers illustrate the style of animal we breed. After over 50 years of selection we have developed a type of Droughtmaster animal that is proven to handle our environment and has widespread market suitability (live export to MSA).

The core of our selection process is the ability to get in calf every year. The result of this philosophy is an animal with higher Brahman content than is currently fashionable (DNA Verified at around 66%), extremely reliable reproductive performance and quite high growth rates.

Research has proven that *Bos indicus* cattle have a significantly more efficient rumen than *Bos taurus* animals. This is important for the performance of our herd and our business. As recorded in the report of McLean and Blakeley (MLAProject Code B.NBP.0779) *Bos Indicus* cows weighing 550Kg and 6 months pregnant have the nutritional requirements of 1.12 Adult Equivalentents whereas the same *Bos taurus* cow requires 1.24 AE. That 10% extra tucker is hard to find sometimes. We contend we have developed a highly adapted herd by indirect selection for a very efficient Rumen. Our cattle can survive, thrive, reproduce and grow well in the Northern Australian environment.

The Valera Vale herds are all BJD check tested. The herds have JBA 7 (WA) status so all buyers can make decisions with the confidence that these standards are being met.

The bulls have been comprehensively vaccinated against the 5 main Clostridial diseases, Leptospirosis, Vibriosis, Tick Fever, 3 Day Sickness and Botulism. They are tested free of Pestivirus persistent infection and the Genetic Pompes Disease. This inherited wasting disease is present in all Bos indicus and Bos Indicus derived breeds but is recessive so by pro-actively testing our bulls we can guarantee none of their progeny will develop Pompes disease regardless of the genetics of the breeders they are mated to.

The catalogue has had a Bull Breeding Soundness Evaluation (BBSE) to Australian Cattle Vets Assoc. standards by experienced and accredited cattle veterinarian Dr. Paul Vetter who will be further endorsing the Valera Vale bulls by buying at the sale. Paul and Margaret's "Cooladdi Park" have used Valera Vale bulls exclusively for decades.

The bulls' semen has been assessed both Crush Side (for live, motile) and in the Laboratory for normal Morphology. There is virtually no evidence that the crush side percentage has any bearing on the number calves a bull produces once the threshold of 30% alive and progressively motile sperm is exceeded. In fact, the variation in crush side percentage is more due to factors not associated with the bull such as collection technique, operator and recent sexual activity.

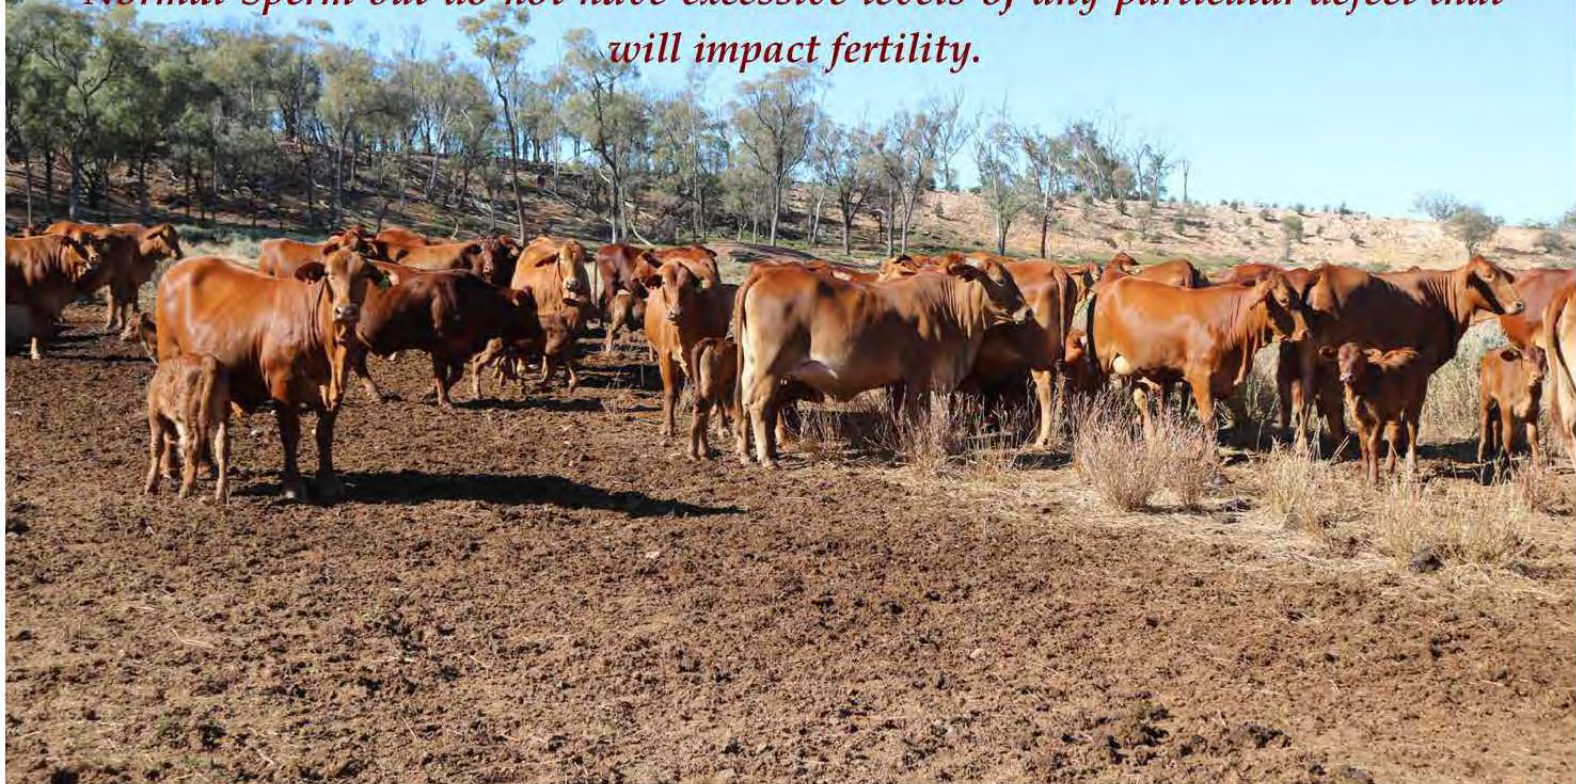

Morphology on the other hand is a more useful assessment as there is a well established association between the number of calves a bull can produce and %Normal sperm and a less well established association with the fertility of his daughters. Importantly, some bulls have consistently very high crush side percentages but have DNA defects which are only picked up by experts with special microscopes in a lab morphology test. These bulls may either be incapable of fertilizing an egg or may produce an embryo that is non-viable and is slipped well before calving. The magic morphology number is set at 50% for a useful bull. In the Bull Power research project, it was

demonstrated that while calf output was multi-factorial, all bulls that failed morphology (less than 50% Normal) performed poorly in terms of number of calves sired.

We believe on our results to date in the Valera Vale herds, we have achieved about 4% higher calving rates by using bulls with good sperm morphology than we were over the previous decades of records.

All the bulls presented in this catalogue have passed a morphology test i.e. they not only have achieved the threshold of 50% Normal Sperm but do not have excessive levels of any particular defect that will impact fertility.

Valera Vale is located between Augathella and Charleville in SW Qld. The homestead and Station Yards are 12 km up the formed gravel VALERAVALE ROAD which runs north west from the Mitchell Highway between Charleville with Augathella. The turnoff is just south of the Warrego River bridges approximately 37.1km from Augathella and 37.9k from the 100k sign from Charleville. There are daily air services by Qantas and Rex Aviation to Charleville from Brisbane. We will gladly meet any flights and arrange transport.

There is a 1000m grass/ gravel airstrip with windsock running
065/245 at the Homestead.

Co-ordinates: **25 59.05 S 146 23.76 E** Elevation 1115Ft

There are SWER powerlines between the Homestead and the 065 threshold

HOW TO REGISTER with

ELITE LIVESTOCK AUCTIONS

- Simply go to www.elitelivestockauctions.com.au using your desktop, laptop, iPad, iPhone or android device.
- Click on the **"Sign Up"** page / link
- Create a bidding profile using the bidder registration page. *(You can either register as a livestock agent, company or private buyer)*
- Agree to the Elite Livestock Auctions Terms & Conditions and the Selling Agents Sale Terms & Conditions as printed in the official Sale Catalogue
- Click **"Register"**
- You will then be notified by email that an account has been created.
- Once an account has been created you are all **"Set to Bid"**
- Each Auction can then be viewed by clicking **"Live Auction"** logo on the Elite Livestock Auctions website.
- Once you receive email notification that your account has been created please go to the sale you wish to bid at and click **"Request to Bid"**
- The sale will then approve your application to bid and on the sale catalogue you will see **"✓Bid Request Approved"**
- On Sale day simply login, click **"Enter Auction"** on the catalogue page and you can start bidding. *(There is no need for software download)*
- At the completion of the auction, invoicing will be carried out as per your registration details by the Selling Agents.

ALDINGA HIPHOP 201/6

Purchased at the Piggott Bull Sale in 2017. Hip Hop is an enormous (well over a tonne), later maturing high content bull with a remarkably docile temperament. He has great skin type and reliably excellent morphology (>90%). He is by Strathfield Express from an Aldinga cow.

ALDINGA HUNDRED was the top priced (\$17,500) bull at the Piggott Bull Sale in 2017. He is by Redskin Casper out of a cow by Oakmore Grantham. She had produced 6 calves in 6 years by 2017 with a calving interval of less than 12 months. Hundred is a higher content, very docile bull with great conformation and environmental adaptation. We have been very impressed by this bull's progeny and have retained sons to work in the stud.

ALDINGA IMPOSING

was the equal top priced bull at the 2018 Piggott Bull sale. He was by Aldinga Davy Jones and had Medway and Yackatoon blood. He was an early maturing fleshy bull but broke down after 1 season so these will be his only calves. His dam, Aldinga Flaunty had had 3 calves in 3 years at the time of his purchase.

A L M A R A M S E S

was purchased as a weaner bull at the 2016 Alma Dispersal Sale. We were very impressed with his mother and tried to buy her as well but Inga Hayes (who had in depth knowledge of the Alma herd) had other ideas. He has noted sires Swan Merlin, Alma Kipper and Valley Cairo in his pedigree. He is a D5 bull.

A MAVALE BRADMAN

by Rocky View 714 and is a half brother to the grand champion droughtmaster bull at Beef 2021 (Farogan Valley Mojo). He produced very impressive high growth loose skinned individuals. He has been particularly influential as a producer of retained females and we have several very good sires by him. Bradman sired Valera Vale top priced bulls last year to Eversleigh/Wallace Vale and in 2017 to ED Cattle Co and the second top prices in 2017 to Fossil Downs and in 2018 to Barlyne stud and has a loyal following from repeat commercial bull buyers. Bradman is the sire of 15064M who has calves catalogued and we have selected another bull to retain by him from the '0 calves. We have used him in our ET and AI programs as well as naturally. He is 11 years old, still sound and being used in Kirstin Wood's developing stud herd.

BY-MINGO QUEBEC

is a highly performed and consistent tropically adapted bull by Hazelwood Pedro and has a pedigree with Billabong, Garthowen and Angle Zed bloodlines. He has a great muscle pattern, good structure and very loose skin that he throws in his progeny. Quebec is the sire of last years top priced bull (Valera Vale Nickel) purchased by Roger and Jenny Underwood of the Eversleigh and Wallace Vale studs.

We really like this bull and have collected semen already to use him more widely and have retained a son from the '0s to use in the herd.

C LONLARA 16110

by Vale View Todd and out of a Clonlara cow by Aldinga 07/47 who had produced 3 calves in 3 years at the time of his purchase. We were impressed with his high morpholgy results at time of sale, which he has consistently achieved througout his breeding career. He is a big growthy bull who consistently produces calves that make the grade for the sale. We have also retained a sire by him to use in the herd. He unfortunately became ill and these will be his last calves.

EVERSLEIGH JUGGERNAUT

was the top priced bull (\$30,000) at the 2017 Roma Droughtmaster sale. He has a pedigree featuring Clonlara, Garthowen, Redskin and Alma bloodlines. He is a heavily muscled, flatter backed bull that has thrown very good calves that appear to be able to hack the going out here. He developed a testicular abscess in his first year and it took a lot of effort and time to resolve so these are the second full season's calves. We wouldn't have gone to the trouble for a lesser bull as the prognosis was very poor.

G

ARTHOWEN ZYLAN 2

Zylan is a very easy doing moderate bull with great temperament. Purchased from the 2019 DN sale he is by Redskin R Houston out of a Garthowen cow from Glenlands bloodlines. We rated this bull very highly, but unfortunately he died earlier this year. We have retained several sires by him for use in the Valera Vale herd.

HIGH COUNTRY GOOGLE

is by Glenlands Quarry out of a cow that had produced 6 calves at the time of his purchase. He was the second top priced bull at the 2018 High Country Sale. We were impressed by his muscle pattern, and large EMA at a young age. He represented a genetic outcross to some of our higher content cows. These are his last calves.

HIGH COUNTRY GRENADIER

is by Billabong Winday (who weighs 1150Kg) and is a grandson of the noted sires Billabong Winchester, Kapalee Goldfinger and Wingfield Boris. He is a moderate framed bull with above average EBVs for growth and has a great temperament. He is out of Coes Creek Angel who produced 3 calves at the time of purchasing Grenadier.

N

INDETHANA JEAN VAUJEAN

was the top priced bull at the 2018 Scenic Rim Droughtmaster sale at \$25,000 thanks to Roger Underwood. He is an AI son of the DN Top priced bull Calaanah Abraham (by Billabong Winchester) out of a very good, highly fertile Nindethana cow by Bryvonlea Malachi. He has impeccable temperament and despite a massive workload (successfully joined with nearly 200 cows in his first year) is always fat and shiny. He is a really remarkable bull producing exceptional calves.

ALERA VALE GODFREY 414

was a docile big framed yellow bull by Jembrae Earl out of Valera Vale 06221F (by Durack Operator) who performed faultlessly throughout her breeding career. He was a later maturing bull and a bit extreme for frame score, but we considered him one of our leading bulls and have retained several sires by him. These are the last of his progeny.

VALERA VALE GRAHAM 427M

Valera Vale Graham 427 is an outstanding large framed high content yellow bull with faultless temperament. He has made a great contribution to the Valera Vale herd in both retained sires and a very useful line of female progeny. He also consistently produced quality sale bulls and has been sold to the Usher family for commercial use.

VALERA VALE 15064M

is one of the best sons of Amavale Bradman but was sold to a commercial breeder because he wasn't homozygous poll. His dam was Valera Vale 06121F who was finally cast for age in 2020 at 14 years of age with a perfect reproductive record intact. A growthy, very highly adapted bull with unflappable temperament he was certainly an asset to the Valera Vale herd and leaves a legacy of great cattle. We have retained a PcPc son out of the 0's to replace him.

ALERA VALE 15128M

has been one of our top sires and was used over some of our elite cows at Rob and Libby Murphy's Logan Park at Tamrookum last season. He sired the reserve champion senior female at this years RNA show. We have used him by AI and Cooper Bischoff has used in him his IVF breeding program at CJB Droughtmasters. His semen is also being used in David Johnstone's Repronomics research program where he has produced 24 recorded progeny to date including two sets of twins. He is a particularly docile bull with a perfect sheath and great structure and muscle. He is 7 years old and we usually part with bulls at that age but he's going nowhere. His dam Valera Vale 10024F was cast for age at 11 years old without missing a calf.

ALERA VALE 15220M

15220M is a later maturing bull by Gen Fosslyn Ewan and is a docile bull with great structure and exceptional length.

Currently still in the herd. This bull has produced a lot of retained females with reliable temperament and fertility.

ALERA VALE 16095M

is one of about 30 retained sires by Lynsey Park Vernon. We don't have a photo but if you look at any of the other photos of Vernon bulls you will know what he looks like: they all look alike. His dam Valera Vale 13312F is 10 years old, still sound and has never missed a calf.

VALERA VALE 16101M

is another Lynsey Park Vernon calf.

He is a full brother to VV Kit Kat, Cooper Bischoff's show heifer and IVF donor. He is an outstanding bull and has been used widely in the herd. 101 is probably our pick of the Vernons so he's the cream of a very good crop. He is out of a No 3 cow (Valera Vale 13342F) that is still going strong and has a faultless reproductive record with 7 calves and a pregnancy.

ALERA VALE 16107M

16107M is by Aldinga Deadly (by Hamadra Maverick out of a Billabong Mansfield cow) is not the prettiest bull in the bull paddock, but he certainly is a prolific producer of really good calves and has contributed many auction bulls over the last few years. His dam, Valera Vale 13336F is 10 years old and still sound and pregnant again after producing 7 calves in 7 years.

VALERA VALE 16304M

16304M is by Talgai Fergus out of Valera Vale 12382F who died after having 6 calves in 6 years. 16304M has produced multiple high quality auction bulls over the last few years and has also contributed a large number of docile, highly fertile daughters.

VALERA VALE 16381M

16381M is by Valera Vale Fury 170 (by Valera Vale Big Time) out of VV 13188F who produced 5 calves in 5 years before being sold.

ALERA VALE 16468M

16468M is by Valera Vale 2020M out of Valera
Vale 12365F who had 7
calves for 7 joinings before CFA due drought.

ALERA VALE 16586M

16586M (by Palmyra Mylerum) demonstrated his toughness after being mauled by dingoes as a calf and surviving without any help. His dam, Valera Vale 14131F produced 4 calves in 4 years before going missing. Pictured here at 18months of age he has contributed many good calves to the bull catalogues and the female herd. Valera Vale 16586M has been sold to the Palmyra stud so these will be the last of his calves.

ALERA VALE 17055M

is another of Lynsey Park Vernons progeny. He is out of Valera Vale 12208F (by Shardale Esko) who produced 8 calves each year since being joined as a yearling and is still sound in the herd and pregnant again.

ALERA VALE 17089M

is a very impressive higher content, very docile bull by the Brahman, Mt Callan Owen. These bulls are used to breed pure Brahman alternatives with pollness, docile temperament and extra fertility and while we are very impressed by his progeny, they are not directly eligible for registration. His dam Valera Vale 11162F is still in the herd and having 9 calves in 9 years and is yet to be preg tested this year due to flooding.

ALERA VALE 17105M

is by the Brahman, Mt Callan Owen. Out of Valera Vale 11130F who has produced 9 calves in 9 years and is yet to be pregtested due to flooding. He was purchased by David Kassulke at our 2018 sale. When we set up the co-operator breeder herd at Bromelton we decided to keep using him.

ALERA VALE 17298M

is by Valera Vale 14326M (by Skye Tally: Wingfield Cagney and Redskin bloodlines) and is quite a big bull with good fleshing and higher content. He is out of Valera Vale 14269F. He was her first calf but has since recorded 6 weaned calves and a pregnancy. She is mainly straight Valera Vale blood.

ALERA VALE 17315M

a paternal half brother to Valera vale 17298M being by Valera Vale 14326M (by Skye Tally: Wingfield Cagney and Redskin bloodlines). Out of 14460F who is still in the herd and has never missed a calf. He is a higher content bull and carries a gyr mark from his Brahman heritage. He is a very prolific producer of top notch calves in multi-sire joinings. We are currently using him in the Argyle Lodge herd.

ALERA VALE 18437M

18437M was selected with consideration of DNA Genomic Analysis as well as phenotype, individual data and dam history.

He is by Valera Vale Godfrey 414 (by Jembrae Earl) out of Valera Vale 14355F who has had 7 calves in 7 years and is PTIC again.

ALERA VALE 18539M

18539M was selected with consideration of DNA Genomic Analysis as well as phenotype, individual data and dam history.

He is by Valera Vale Graham 427 (who has calves in this catalogue) out of VV 14138F who has had 7 calves in 7 years and is PTIC again.

ALERA VALE 18596M

18596M was selected with consideration of DNA Genomic Analysis as well as phenotype, individual data and dam history.

He is by the great Lynsey Park Vernon out of VV 12249F who produced 8 Calves in 8 years. Now recorded as dead/missing. First joined as a yearling.

ALERA VALE 18828M

18828M was selected with consideration of DNA Genomic Analysis as well as phenotype, individual data and dam history.

He is by Valera Vale Flynn 034 out of one of our ET cows who had 8 calves in 8 years before joining ET program.

This bull is the last of her natural calves and she has since been CFA.

VALERA VALE 16318M

16318M is by Valera Vale Freddy 029 (by the great Valera Vale Bazza 151) out of VV 13415F who has had 7 calves in 7 years and is PTIC again.

VALERA VALE 16410M

16410M is by Valera Vale Dynamo 399(Fairhaven, Billabong and Cungelella genetics) out of VV 12095F who produced 5 calves in 5 years before being culled as empty.

VALERA VALE 17549M

17549M is by Valera Vale Force 060 (Hamadra bloodlines) out of Valera Vale 12388F who was yearling mated and has had 9 calves in 9 years and is now CFA

ALERA VALE 18209M

18209M was selected with consideration of DNA Genomic Analysis as well as phenotype, individual data and dam history.

He is by Valera Vale Garfield 073 (by the great sire VV Bazza 151) out of VV 14031F who has had 6 calves in 6 years and is PTIC again.

ALERA VALE 18562M

18562M was selected with consideration of DNA Genomic Analysis as well as phenotype, individual data and dam history.

He is by Valera Factor 178 (sold to High Country Droughtmasters) out of VV 14555F who has had 6 calves in 6 years and is PTIC again.

ALERA VALE 18614M

18614M as selected with consideration of DNA Genomic Analysis as well as phenotype, individual data and dam history.

He is by the great Lynsey Park Vernon out of VV 12251F who was yearling mated and has had 9 calves in 9 years and is PTIC again. She will be CFA after this next calf.

VALERA VALE 18772M

18772M was selected with consideration of DNA Genomic Analysis as well as phenotype, individual data and dam history. is by Valera Vale Graham 427 (also represented by calves in this catalogue) out of VV 13518F who has had 7 calves in 7 years and is PTIC again.

VALERA VALE 18820M

18820M was selected with consideration of DNA Genomic Analysis as well as phenotype, individual data and dam history. He is by Wajatryn 1403 (by the great Redskin X-Factor) out of VV 09058F who has had 11 calves in 11 years and is has not been Preg Tested yet this year due to flooding.

WOODBINE WRANGLER

Purchased at the 2013 DN sale, Wrangler has been a very reliable bull for us and at 11 years of age is still sound and now on loan to Cooper Bischoff for his CJB stud herd. He's very structurally correct with an ideal sheath. Wrangler is by Trafalgar Veloso from a Woodbine cow with Huntly and Yackatoon bloodlines.

Vaccinations

*As usual Valera Vale offers **Free Delivery** to the nearest major centre in QLD (including Mt Isa, Charters Towers, Birdsville and South East Qld) on all bulls purchased at the sale.*

*For buyers outside QLD as an alternative to free delivery, **bulls travelling to WA or NT will receive \$250 and to NSW \$150 per bull Freight Rebate** to assist with their trip home. Please ensure delivery instructions are as clear as possible as outside carriers may be used.*

Bulls can be inspected at Avilion, Greymare prior to Friday the 23rd of September, or at Valera Vale from 24th of September until sale day. Clients not able to travel west to Valera Vale can choose their bulls at Avilion or by reviewing the data and pre-recorded individual lot videos.

The sale will be livestreamed (video and audio) on the elite livestock platform allowing clients to make their purchases without leaving home, and the bulls will be delivered to them after the sale at no charge.

Bulls are the purchaser's risk from the fall of the hammer and insurance is recommended.

At *Valera Vale* we are continuously recording data on our cattle...

And we take that data **VERY** seriously!

Registration with Droughtmaster Australia

The Flynn family have been breeding Droughtmasters since 1979. The Valera Vale Droughtmaster herd numbers over 6,000 animals including those run on co-operator herds owned by AJ Bush and Sons and David Kassulke at "Argyle Lodge", Beaudesert and by John and Nikki Cleary on "Avilion", Greymare.

The herd is mainly pure Droughtmaster but there has been some infusion of extra Brahman blood in recent times and we buy and have used unregistered pure Droughtmaster bulls from sales such as Glen Fosslyn and Clonlara. We also lack reliable pedigree data on some cows. Because of this some of the bulls catalogued in the sale cannot be registered with the Breed Society through the conventional system and these are identified against the catalogue lots.

Eligibility for entry into Western Australia

We have no history of BJD and many clean tests on all of the Valera Vale PICs so meet all the requirements for entry into WA. Fluke testing and drenching required prior to leaving QLD as per WA entry requirements (LB1 part 3) will be undertaken by Valera Vale at no cost to our buyers.
