

**2023 KOONANDAH
BRAHMANS BULL SALE**

Koonandah Brahman Bull Sale

Our 2023 Bull sale comprises of over 120 of our best bulls. Coming off our excellent rain this year, our bulls are in very good condition, fully grass fed and ready to work. Most of our bulls are polled or scurred with the majority being greys.

When: Inspections from 8am Friday 14th July 2023
Sale commences: 10am
Prebidding Online: 10am Tuesday 11th July
Where: Koonandah Station
19870 Bruce Highway, North of Bowen
Contact: Bruce Smith – 0459 122 083
Dale Smith – 0428 852 257
Elders Contact: Anthony Ball – 0428 275 499
Scott Mawn – 0417 196 515
Online Sale: Facilitated by Auctions Plus

Dale, Marilyn, Bruce and Anne welcome all to Koonandah Station and look forward to talking with you on sale day.

We would like to extend our thanks to the businesses below for their time and attention to our sale.

Buyer Information

All bulls come with Breedplan data showing pedigree and EBV's for weights and traits. Bulls have received their 7 in 1 and botulism vaccinations.

All buyers will be responsible for their own delivery arrangements, please coordinate with your agent. We are happy to facilitate shared loads where possible.

NLIS transfer is the responsibility of the agent.

All buyers are responsible for their own insurance on their purchased bulls before they leave the property.

Bulls are sold as unregistered herd bulls, but can be registered on request.

The Estimated Breeding Values (EBV's) contained in the catalogue are compiled by Australian Brahman Breeders Association (ABBA) from data supplied by the breeders and should be used as a tool in the selection of bulls and confirmation should not be ignored.

Sale Proceedings

- Elders and Auctions Plus will be facilitating our bull sale this year; Scott Anthony and the girls will be available on the day to assist with any questions that you have.
- Inspections will begin at 8am on Friday 14th July at Koonandah Station
- Parking will be near to the yards, please look for the signs
- Make your way into the yards following the signage. The Elders tables will be situated at the back of the yards under cover
- Please register at the Elders table for your buyer number and collect your catalogue
- Refreshments will be between the yards and the sheds, morning tea and lunch will be available
- Anyone that attends the property does so at their own risk and the vendors assume no responsibility or liability for any accident that may occur.

Helmsman Bid System – On Property

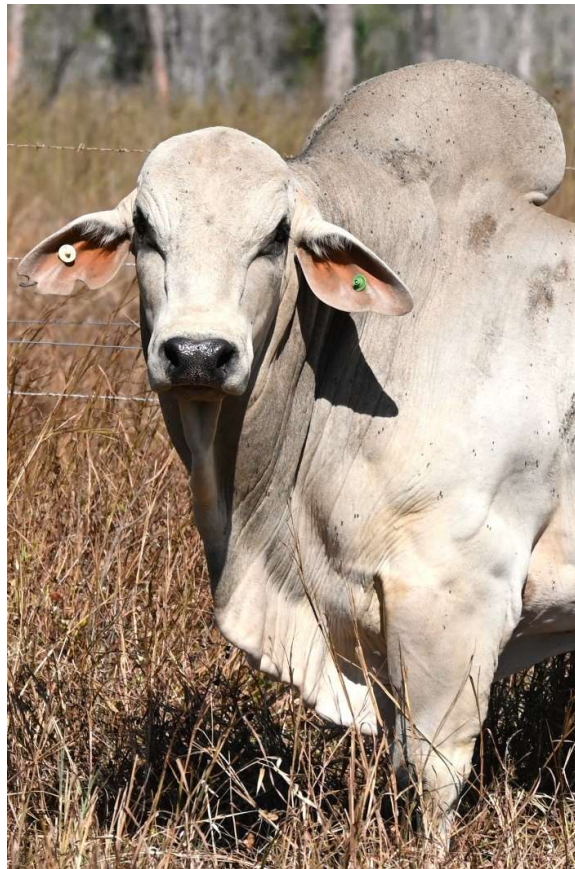

The Helmsman Bid System is a no pressure, quiet and easy system of sale.

- Register for a bid card and collect a catalogue on arrival
- Inspect the cattle at your leisure and make notes in your catalogue
- At 10am the bidding will start and all bulls are on offer at the same time
- Place your bids using your bidding card with your buyer number and the bulls lot number and hand to an Elders agent
- Bids will be displayed on the wall near the Elders table
- Any number of bulls can be bid on at the one time and you will be able to see on the display if your bid has been overtaken
- You can bid on any bull at any time, as many times as you wish
- Once a bid is recorded, it cannot be retracted. The person making the bid is responsible until they are overbid
- The sale will be open until approximately 1 pm, when at the discretion of the presenter, the 2 minute “no bid” time will commence
- A bid registered in the last 2 minutes will result in a 2 minute extension of time
- This extension of time will continue until there is a full 2 minutes with no bid, at which time the sale will conclude

Helmsman Bid System – Online

Auctions Plus will be hosting the online auction.

- Prebidding opens on Tuesday 11th July 2023 at 10am
- Short videos of individual lots can be viewed on the Auctions Plus website
- Please use the enclosed flyer on how to register with Auctions Plus and note that you must register **48 hours** before you can place a bid
- Utilise the maximum bid/auto bid function so the computer can bid on your behalf
- Check your email and text messages to confirm if you have been out-bid on a lot
- A 2 minute bid extension period applies to all lots – all lots will remain open until there are no bids on all lots in this sale

Estimated Breeding Values (EBVs)

Koonandah Brahmans has been recording data with Breedplan for over 25 years. The data collected from our cattle along with other properties provides us with Estimated Breeding Values or EBVs.

The absolute value of any EBV is not critical, but rather the differences in EBVs between animals.

Although EBVs provide an estimate of an animal's genetic merit for a range of production traits, they do not provide information for all of the traits that must be considered during selection of functional animals. In all situations, EBVs should be used in conjunction with visual assessment for other traits of importance (structural soundness, temperament, fertility etc). A recommended practice is to firstly select breeding stock based on EBVs and to then select from this group to ensure that the final selections are visually acceptable.

200-Day Growth EBV (kg) provides an estimate of genetic differences between animals in live weight at 200 days of age due to their genetics for growth. Larger, more positive 200 Day Growth EBVs are generally more favourable. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-Day Weight EBV (kg) provides an estimate of genetic differences between animals in live weight at 400 days of age. This EBV is important for breeders turning off animals as yearlings. Larger, more positive 400 Day Weight EBVs are generally more

600-Day Weight EBV (kg) provides an estimate of genetic differences between animals in live weight at 600 days of age. This EBV is important for breeders targeting the production of animals suited for heavy weight grass or grain fed markets. Larger, more positive 600 Day Weight EBVs are generally more favourable.

Scrotal Size EBV (cm) provides an estimate of genetic differences between animals in scrotal circumference at 400 days of age. Larger, more positive, Scrotal Size EBVs indicate are generally more favourable. There is also a small negative correlation with age of puberty in female progeny and therefore selection for increased scrotal size will result in reduced age at calving of female progeny.

Days to Calving EBV (days) provides an estimate of genetic differences in fertility of the daughters of the sire. It is the time interval between the date when the female is first exposed to a bull in a paddock mating to the day when she subsequently calves. Relatively lower EBVs for days to calving indicate shorter interval from bull-in date to calving and therefore higher fertility.

Production Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined for a typical self-replacing commercial herd targeting pasture finished steers. Selected heifers are retained for breeding and so maternal traits are of importance. Steers target 580 kg live weight (315 kg carcass weight and 10 mm P8 fat depth) at 27 months of age, and heifers 470 kg live weight (250 kg carcass weight and 12 mm P8 fat depth) at 25 months of age.

Live Export Index (\$) - Estimates the genetic differences between animals in net profitability per cow joined for a typical self-replacing commercial herd (tropical environment) targeting steers for the live export markets. Steers are assumed to be marketed to the live export agencies at 300 kg live weight and then slaughtered after 120 days feedlot finishing at 470 kg live weight (255 kg carcass weight).

Koonandah Brahman EBVs

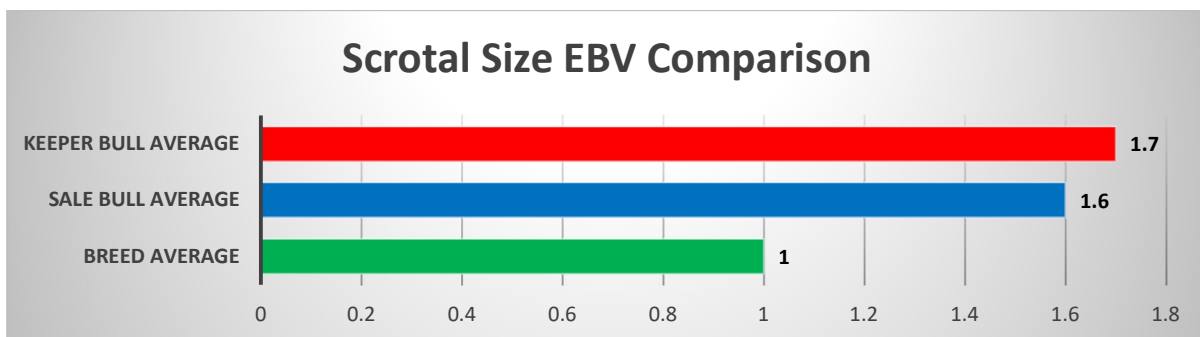

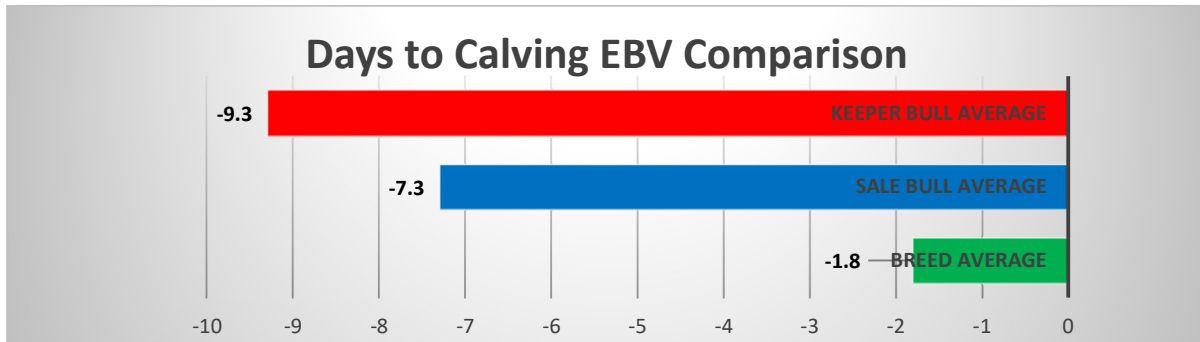

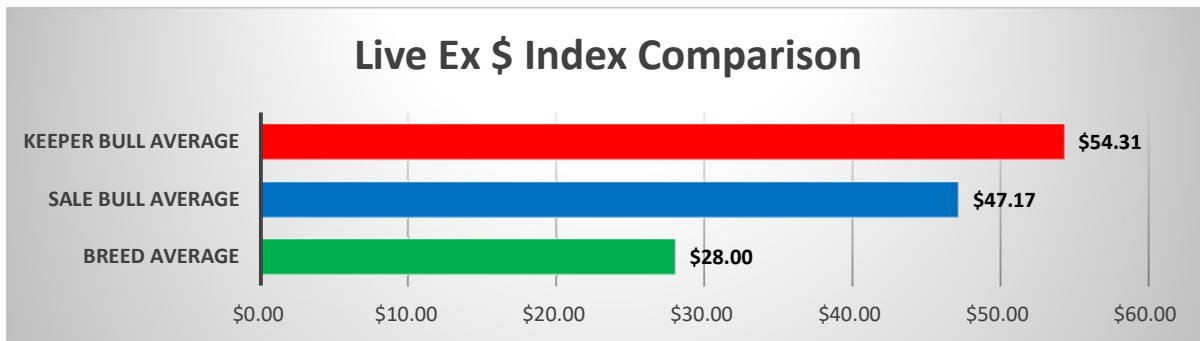

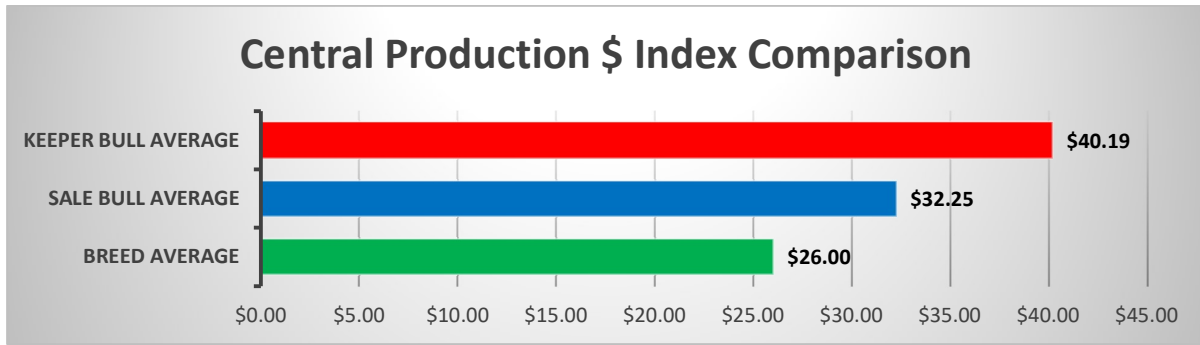

It is important to note that 100% of the Koonandah Brahman herd is presented off grass. The sale bulls for 2023 are mostly rising 2 year olds, with some 3 year olds, that are sold ready to work.

The sire joining period for the breeders is from October to January (120 days) and the heifers are from October to December (90 days). The female calving rate for 2023 is exceptionally pleasing and higher than last year. The heifers pregnancy test results were 95% and the breeders was 83%. Our expectation is that all females must wean a calf annually or be culled.

Koonandah Brahman believe in functional cattle that perform in the paddock year in and year out. It is understood that fertile bulls are essential for a profitable herd. The Koonandah herd is serviced by keeper bulls which allows management to monitor performance and select desirable traits. By selectively breeding in desirable traits, Koonandah keeper bulls have enabled management to achieve some really outstanding results.

Below you will see some graphs showing the performance of the Breedplan breed average, our 2023 sale bulls and our Koonandah keeper bulls.
