# Welcome

Welcome.....

to our 2nd off-property, under the hammer, sale at the Eidsvold Selling Complex.

We're proud to present our 2020 selection of both Charbray and Charolais bulls.

Our 2020 sale team includes predominantly Charbray bulls both of horned and polled phenotype, including our signature  $\frac{3}{4}$  Charbray type for those looking for a Charolais type with the hardiness of Grey Brahman.

There are three Charolais bulls, one three-quarter Charolais and 14 Charbray bulls on offer.

Again we're going the extra mile, providing as many scans and measurements as possible (including morphology) so you have all the information required to assist in selecting the bull most suited to your operation.

Whilst we enjoy presenting these bulls fully at sale, it should be noted they have not been pampered their entire life. They are raised in forest paddock conditions and following weaning fend for themselves on river country until their sale preparation begins. Their prep is with a high roughage total mixed ration in a dry grass paddock and not green crop. This style of preparation has helped us receive previous feedback stating our bulls had "held up" under trying seasonal conditions.

By placing the sale local to our client base we endeavour to allow our clients to access quality bulls at affordable prices and without the associated costs of major travel and accommodation to attend other sales. Also the bulls will be presented tick free and we'll be assisting successful buyers to get their new bulls home.

Those who purchase on the day will have an added bonus to gain entry in the draw for a bottle of our very own signature premium blended "Burnett Park" rum. Every lot sold will gain a rum entry, so multiple bull buyers will have multiple chances to win.

Previously the Plowman family's, Ruby Ridge Black Angus Stud had joined us in the sale. Unfortunately due to the extenuating dry conditions they're unable to present bulls this year, however we're hoping they'll return to future sales.

Of course we're again providing smoko and lunch for our supporting clientele in a warm and friendly "sale day out" atmosphere.

We appreciate your support and wish you well with your purchases.

Thank You from

The Whitaker Family

# Whitaker Brahman Charbray Charolais

Whitaker Brahman, Charbray and Charolais is a first generation operation conducted by principals Clint and Robyn Whitaker and assisted by their teenage children, Sam and Brianna.

With the home base located at "Burnett Park" on the magnificent Burnett River, just out of Mundubbera, the family also runs other holdings located in the beautiful Hollywell district at Eidsvold and its main breeding enterprise at "Cosland" in the historic Abercorn district. Complimenting the operation is agistment country in the Mundubbera and Mt Perry surrounds.

The Brahman breed underpins the entire operation and stems from Clint's first introduction to the breed many years ago whilst holidaying as a teenager at a prominent Burnett Region stud. On the other hand, Robyn had a history of stud show animals and her grandfather had shown at the Ekka for 49 years straight, with Robyn attending as a child for many years.

In short Clint and Robyn were fortunate to access Grey Brahman genetics from a foundation stud dispersal and later to secure Red Brahman genetics that included the birth of "Whitaker Maggie" on the day of delivery. "Maggie" has since not only become the matriarch of the Whitaker Red Brahman herd but has won Brahman Cow of the Year on three consecutive occasions and been inducted into the Brahman Breed's Register of Renown.

Owning this highly fertile super Brahman cow has introduced the Whitaker's into the world of advanced genetical gain with their preferred medium of In-Vitro Fertilisation (IVF) having been extensively used throughout their Red and Grey Brahman herds.

From there it was expanded into their Charolais genetics as the Whitaker's looked to advance their Charolais herd. Whitaker Charolais secured the Australian semen rights to the highly acclaimed Canadian Charolais super bull "CML Encore 4Y" and has used this polled bull along with others to develop their Charolais herd. Lot 15, Whitaker Mr 650, in this year's sale is by "Encore".

Whilst demand for polled cattle is rapidly growing, and the Whitaker's see the benefits of such and provide to meet market demands, they also are very aware growth and carcass weight is heavily associated to horned genetics. So they try to keep a balanced approach to the polled equation and produce for all market requirements.

The Whitaker's breed cattle with high natural resistance to Buffalo Fly and cow groups are kept separate for straight breeding purposes. The Charbrays are made up of the traditional Classic Charbray content cattle of 50% Charolais, 50% Grey Brahman whilst the Whitaker's also run a paddock of generational bred Charbray stock concentrating on polled genetics in this herd.

To the future the Whitaker's aim to continue to produce commercially orientated cattle, able to adapt to any environment including country type and seasonal variances. They also plan to continue this Eidsvold sale as an annual event and welcome feedback on how they can ensure customer expectations are met.

# Lucky Bull Draw

Successful purchasers of any bulls in this year's sale will go in the draw to win a bottle of our specialty "Burnett Park Premium Bundaberg Rum" valued at \$125.
